### Introducing the VL-10HP High-Speed Post-Stamp Tax Stamping Machine

**Lancaster, New York, December 18, 2009** – United Silicone, manufacturers of Meyercord brand tax stamping equipment, first revolutionized post-stamping with its original VL-10 Tax Stamping Machine. Now the VL-10HP is supercharged up from 70 cartons per minute to a *consistent* 100 cartons per minute. Differing carton sizes are supported by sturdier springs that maintain a longer life than standard VL-10 springs. These new springs withstand the additional acceleration that comes along with high-speed performance. An improved glue system and opener system also complete the VL-10HP Tax Stamping Machine for customers looking for the ultimate in hands-off, post-stamping technology.

Call (800) 639-3799 for more information. Post-stamping is now fast stamping.

**About Meyercord Tax Stamping Equipment** – Meyercord Tax Stamping Equipment is the source for tax stamping equipment and service solutions for the distribution industry.
